### **DETAILED ACTION**

Receipt and entry of the amendment dated 6/30/2006 is acknowledged. After entry of the amendment, claims 67 and 68 are pending and under examination.

#### ***Double Patenting***

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 67 and 68 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 53 and 54 of prior U.S. Patent No. 6,355,412. This is a double patenting rejection.

**This rejection is maintained for reasons made of record in the Office Action of 01/26/2006 and for reasons set forth below.**

#### ***Response to Arguments***

Applicant's arguments filed 6/30/2006 have been fully considered but they are not persuasive. Applicants assert that the instant claims recite a specific orientation of the homology arms of the vector DNA relative to the orientation of the first and second termini of the target DNA, such that recombination between the homology arms and the termini results in the target DNA being inserted between the homology arms. Because claims 53 and 54 of the '412 patent do not recite such a limitation, applicants assert that the instant claims are of a different scope.

Art Unit: 1633

This is not convincing because the recitation of the orientation of the homology arms such that recombination can occur does not further limit the instant claims relative to the '412 claims. The claims of the '412 patent and the instant claims embrace situations as outlined in Fig. 1 of the '412 patent. Both sets of claims also embrace situations wherein, for example, the homology arms A and B of the vector DNA are switched. This is still considered to be the "same" orientation as the C and D termini of the target DNA because the reference point for any such orientation is arbitrary, i.e. the homology arms and termini still bracket the origin of replication and target DNA, respectively. Furthermore, if the homology arms were switched as described above, homologous recombination would still occur, guided by the adaptor oligonucleotides. There appears to be no situation wherein this recombination event would not yield a DNA molecule with the target DNA sequence being inserted between the homology arms, as required by both the '412 claims and the instant claims. Therefore, the instant claims and claims 53 and 54 of '412 are still considered to be coextensive in scope.

### ***Conclusion***

No claims are allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 1633

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
